

Mukthi Stupi - The Liberation Pillar

Your sacrifice and feelings of compassion become Amrith and open your Sahasrara. It comes out like a fountain. This is Amara-taaraka, the Star of Immortality. For the saints, sages and yogis Amrith drops fall within them. It gives them immortality. I showed the immortal star emerging from your Sahasrara. Sacrifice becomes Amrith. Amrith becomes Light. Light becomes vibrations and spreads everywhere. This grants Mukthi for everyone. You attract people from the four directions and take them upwards ---- Swami

Swami told Amma to construct Mukthi Stupi in Mukthi Nilayam during meditation in April 2002. He also revealed the physical details of the stupa.

In November when Amma visited Puttaparthi for Swami's birthday, He asked her to start the construction of the Stupa immediately. Swami told to construct the stupa in front of her room in the Mukthi Nilayam ashram. The location of the Stupa is significant, with a meaning and purpose that, it will continuously absorb her divine vibrations and transmit them to the whole world.

After knowing the significance and purpose of the Mukthi Stupa, Amma started the construction work, through Shri Ganapathy Sthapathy, a world renowned temple architect and vastu shastra expert. Incidentally, all the Naadi readings about the Stupa also revealed some interesting details, including the date on which the Bhoomi Puja shall be conducted and the

process of Pranapratistha.

On the 5th March 2004 the foundation of the Stupi was laid out. The foundation vault was filled with the sacred items prescribed by the Naadis. The ashramites collected soil and water across India, from some of the holy places from Himalayas to Kanyakumari, as well as from some of the holy places around the world. Amma has manifested and infused her powerful and earth-transforming Prema Shakthi into the foundation vault, along with the holy objects, explaining that all these are the symbolic representation of the 19 divine qualities of Radha.

After two years of intricate hand-carving of the super structure for laying a solid base, the main pillar installation was started on 12th Feb 2006. Six months later the Stupi's main edifice was completed, with a huge stone-carved thousand petalled lotus, fixed over the gleaming white stone pillar and a huge golden star at the top, pointed towards the sky, symbolically connecting both the heaven and the earth.

1. Mukthi Stupi is a tall, white, cylindrical monument topped with a golden star and wheel. It is located in the heart of the city of Mukthi, India. The monument is a symbol of the city's freedom and independence. It was built in 1957 to commemorate the 50th anniversary of India's independence. The monument is a popular tourist attraction and is visited by thousands of people every year.
